## Kunstmatige intelligentie maakt Belgische biertjes lekkerder

## Dating-app Breeze mag (en moet) algoritme aanpassen om discriminatie te voorkomen

Nieuwsbericht | 06-09-2023 | 06:09

De Nederlandse dating-app Breeze vroeg aan het College voor de Rechten van de Mens of ze hun algoritme mogen aanpassen, zodat mensen met een donkere huidskleur en van niet-Nederlandse afkomst net zo vaak worden voorgesteld aan andere gebruikers als mensen met een lichte huidskleur en van Nederlandse afkomst. Of zou dat voorkeursbeleid zijn? Dat is het niet, [oordeelt het College](#). En de aanpassing mag niet alleen, die moet ook.

**Prompt:** Write me a detailed report of this crime scene

Based on the image provided, here is a detailed report of the constructed LEGO crime scene:

**Location:** The scene is set on a green LEGO baseplate, suggesting an outdoor environment, as indicated by the background depicting a grassy field and a wind turbine.

**Incident:** A vehicular accident appears to have occurred, involving a black LEGO car which is overturned near the center of the scene. The vehicle's orientation and the scattered LEGO pieces around it suggest it may have been involved in a high-impact event.

### **Victims and Witnesses:**

- There's a LEGO figure lying face down next to the overturned car, possibly suggesting ejection from the vehicle or a pedestrian who was struck.
- A second LEGO figure is positioned upright, dressed in blue, standing behind a speed limit sign displaying "50," potentially a witness or a passerby.
- A third LEGO figure, with an orange hairpiece, is situated towards the front-right of the scene, seemingly in a running or walking posture, possibly fleeing from the scene or rushing towards to help.

How does the host selection of the rugby world cup work

The selection of the host for the Rugby World Cup is decided by a vote of World Rugby Council members. The voting procedure is managed by a team of independent auditors, and the voting is kept secret. The host nation is generally selected five or six years before the competition. World Rugby requires that the hosts must have a venue with a capacity of at least 60,000 spectators for the final. Host nations sometimes construct or upgrade stadia in preparation for the World Cup.

**M** YOU  
Generate for me an infographic on practical applications of Generative AI for everyday office jobs

**CHATGPT**

Here's an infographic showcasing practical applications of Generative AI in everyday office jobs. It illustrates how Generative AI can assist in writing and editing documents, generating reports, scheduling and organizing meetings, automating email responses, and enhancing creative projects like presentations and marketing materials, all in a clean and professional layout.

“Geef me specifieke use cases voor Generatieve AI in accounting in zes bullet points met relevante smileys aan het begin van elke zin”

-  **Factuurverwerking:** Automatiseert het lezen en verwerken van facturen.
-  **Boekingen Genereren:** Creëert automatisch journaalposten uit transactiedata.
-  **Fraudedetectie:** Identificeert afwijkingen in financiële data voor fraudepreventie.
-  **Budgetvoorspelling:** Genereert toekomstige budgetten op basis van historische data.
-  **Financiële Rapportage:** Stelt financiële rapporten op met inzichten en analyses.
-  **Belastingoptimalisatie:** Biedt strategieën voor belastingefficiëntie door data-analyse.

 **You**  
Geef me specifieke use cases voor Generatieve AI in accounting in zes bullet points met relevante smileys aan het begin van elke zin

 **ChatGPT**

-  **Automatisering van gegevensinvoer:** Gebruik generatieve AI om ongestructureerde financiële documenten, zoals facturen en bonnen, te analyseren en relevante informatie direct in boekhoudsoftware in te voeren.
-  **Fraudedetectie:** Implementeer generatieve AI-modellen om transactiegegevens te analyseren, afwijkingen te detecteren, en verdachte activiteiten te markeren, waardoor de nauwkeurigheid van fraudepreventie wordt verhoogd.
-  **Financiële rapportage en analyse:** Gebruik generatieve AI om complexe financiële gegevens automatisch om te zetten in begrijpelijke rapporten, grafieken en dashboards, wat tijd bespaart en inzichten verbetert.
-  **Voorspelling van kasstromen:** Zet generatieve AI in om historische financiële gegevens te analyseren en toekomstige kasstromen te voorspellen, waardoor bedrijven betere budgettaire en financiële beslissingen kunnen nemen.
-  **Automatisering van boekhoudkundige journaalposten:** Pas generatieve AI toe om terugkerende financiële transacties te herkennen en de bijbehorende boekhoudkundige journaalposten automatisch te genereren, wat de efficiëntie verhoogt en fouten vermindert.
-  **Optimalisatie van belastingaangifte:** Gebruik generatieve AI om belastinggegevens te verzamelen en te analyseren, belastingaangiftes te optimaliseren en belastingbesparingsmogelijkheden te identificeren, wat leidt tot tijdsbesparing en kostenreductie.

# 'Overheid Nederland wil ambtenaren verbieden ChatGPT en Midjourney te gebruiken'

Door **Arnoud Wokke**

Redacteur

Feedback • 16-11-2023 10:52 213

**De Nederlandse demissionaire staatssecretaris voor Digitalisering Alexandra van Huffelen werkt aan een voorstel om ambtenaren te verbieden toepassingen voor generatieve AI te gebruiken. Daarbij gaat het onder meer om ChatGPT en Midjourney.**

Van Huffelen wil het voorstel binnen afzienbare tijd voorleggen aan de ministerraad, [meldt de Volkskrant](#). Toepassingen voor generatieve AI voldoen vermoedelijk niet aan de privacyregels die gelden voor overheidssoftware. Daarnaast zetten ambtenaren bij het gebruik vermoedelijk vertrouwelijke informatie in de toepassingen, waardoor die bedrijven daar inzage in krijgen.

Bovendien zijn er vragen over of dergelijke AI-toepassingen auteursrechten schenden doordat een model op auteursrechtelijk beschermd materiaal wordt getraind. Een andere reden is nog dat AI-toepassingen mogelijk in gebruik kunnen raken om beslissingen over personen te nemen, iets wat Van Huffelen onwenselijk vindt.

# DUTCH GOVERNMENT BUILDS OWN GPT

Het demissionaire kabinet trekt bijna €400 mln uit om Nederland 'koploper' te maken in het toepassen van AI. Dat de technologie banen gaat kosten is duidelijk, maar, zegt staatssecretaris voor Digitalisering Alexandra van Huffelen: 'We laten niet zomaar een sociaal experiment over ons heen komen'.

Alexandra van Huffelen: 'Wij bepalen welke vormen van AI we willen, en welke niet.' Foto: Lex van Lieshout/ANP

General News · 27 Feb 2024

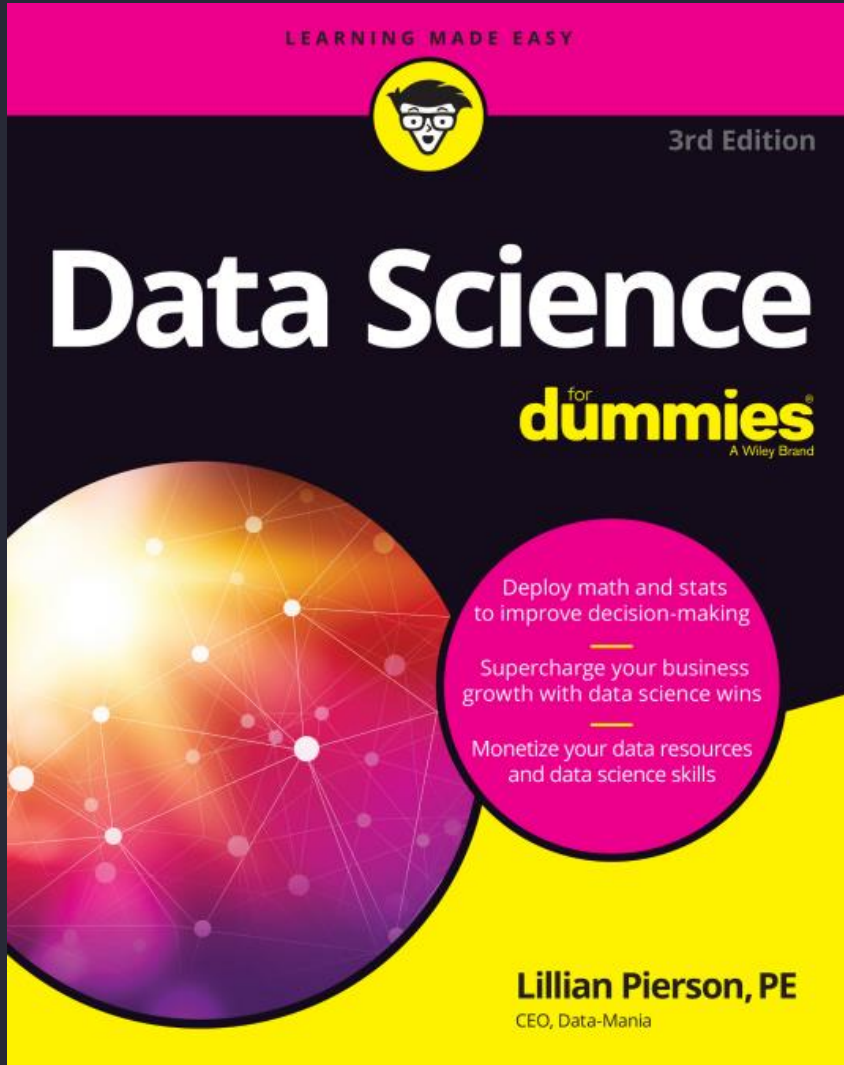

# Klarna AI assistant handles two-thirds of customer service chats in its first month

**New York, NY – February 27, 2024** – [Klarna](#) today announced its AI assistant powered by OpenAI. Now live globally for 1 month, the numbers speak for themselves:

- The AI assistant has had **2.3 million conversations, two-thirds of Klarna's customer service chats**
- It is doing the equivalent work of **700 full-time agents**
- It is on par with human agents in regard to customer satisfaction score
- It is more accurate in errand resolution, **leading to a 25% drop in repeat inquiries**
- Customers now **resolve their errands in less than 2 mins compared to 11 mins previously**
- It's available in **23 markets, 24/7** and communicates in more than **35 languages**
- It's estimated to drive a **\$40 million USD in profit** improvement to Klarna in 2024

Klarna has also seen massive improvement in communication with local immigrant and expat communities across all our markets thanks to the language support.

A woman is shown from the chest up, holding a vintage camera to her eye. Her hair is styled in a bun and is heavily decorated with a collage of nature elements, including green leaves, red and orange autumn leaves, blue butterflies, and small trees. The camera's lens is the focal point, showing a detailed landscape of snow-capped mountains and a valley. The background is a soft-focus scene of a beach and ocean under a blue sky with light clouds. The overall aesthetic is artistic and nature-inspired.

Current situation:

AskGPT:

“Ray and I hoped to design a relational language based on concepts that would be familiar to a wider population of users. We also hoped to extend the language to encompass database updates and administrative tasks such as the creation of new tables and views, which had traditionally been outside the scope of a query language.

[...] What we thought we were doing was making it possible for nonprogrammers to interact with databases. We thought that this was going to open up access to data to a whole new class of people who could do things that were never possible before because they didn't know how to program.”

Anime

Neon Punk

Line Art

**\*\*Relevant Objects:\*\***

1. Police Cap - Worn by the police figure, signifying law enforcement involvement.
2. Safe Deposit Boxes within the bank.
3. ATM Machine
4. Money in the form of LEGO pieces
5. Sack being held by the individual in a striped prison outfit
6. Shovel, held by the individual dressed as a worker.
7. A tree and street lamp, which are common in a city street setting.

**\*\*Potential Scenarios:\*\***

1. A robbery has occurred, with the individual in the striped prison outfit as the prime suspect, taking place inside the bank.
2. The construction worker might have either inadvertently provided a means of escape for the suspect.
3. The civilians present are either incidental witnesses to the aftermath or could be involved in the situation, their expressions indicating shock or distress.

**\*\*Conclusion:\*\*** Given the available evidence, the most likely scenario is that a robbery has occurred, with an individual holding the sack as the prime suspect, given their attire and possession of stolen money. The scattered money indicates a haste in the suspect's actions, possibly evading law enforcement. The police officer on the scene and the individual with the shocked expression suggest the robbery has disrupted the daily activities of the city street. The investigation would focus on identifying the suspect, any potential accomplices, and ensuring the recovery of the stolen items.
